EDUCATION

B.Tech in Information Technology — ABES Engineering College, Ghaziabad

Oct 2023 – Jul 2027

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android SDK, Firebase Auth, Cloud Firestore, Realtime Database, Provider

Programming Languages: Dart, C++, Java, JavaScript, SQL

Backend & APIs: REST APIs, GraphQL, JSON, Asynchronous Programming, Firebase,

Developer Tools: Git, GitHub, VS Code, Android Studio, Figma, Canva

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, System Design, SDLC

PROJECTS

CodeSphere — Coding Analytics App

Jan 2026 – Feb 2026

Flutter · Dart · GraphQL · REST APIs · Firebase · Provider · Android

- Developed and deployed a production-grade Flutter Android app aggregating real-time coding stats from LeetCode (GraphQL), CodeChef, Codeforces, and GitHub into a unified cross-platform dashboard.
- Engineered a 3-layer adaptive caching strategy (in-memory + SharedPreferences + stale-while-revalidate) that reduced API calls by 85–90% while maintaining near real-time data accuracy, cutting cold-start latency by ~60%.
- Integrated Grok AI (REST, v1beta) with model fallback chain, exponential backoff, and 60-second hard deadline to power an AI Insight Coach feature for personalized coding progress analysis.

E-Commerce Shopping Application

Oct 2024 – Dec 2024

Flutter · Dart · Firebase Auth · Cloud Firestore · Realtime Database

- Built a full-featured mobile e-commerce app supporting 3 distinct user roles (buyer, seller, admin) with end-to-end shopping flows, order management, and role-based access control via Firebase Auth.
- Designed real-time cart functionality with Firestore listeners — syncing product catalog, cart state, and price totals across sessions instantly without manual refresh, achieving <200 ms UI update latency.
- Implemented secure session management with registration/login/logout lifecycle; structured Firestore collections for scalable product and order data with automated price recalculation on cart events.

Cross-Platform Weather Application

Aug 2024 – Sep 2024

Flutter · Dart · REST APIs · JSON · OpenWeatherMap API

- Built a cross-platform Flutter weather app consuming OpenWeatherMap REST API with JSON parsing, achieving a 99.9% API call success rate through robust error handling and retry logic.
- Designed responsive UI with location-based auto-detection and 7-day forecast display, reducing user interaction steps by 40% compared to manual city-entry flows.

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- Smart India Hackathon (SIH): Nominated in top 45 teams out of 500+ entries — represented ABES Engineering College at the national level.
- LeetCode: Solved 400+ problems in C++ with a contest rating of 1550+, demonstrating strong DSA and algorithmic problem-solving skills.

LEADERSHIP EXPERIENCE

Social Media Head — Google Developer Groups (GDG) ABESEC

Sep 2025 – Present

- Managed social media strategy for a developer community of 1000+ members, growing post engagement by 200% through targeted technical content, event promotions, and consistent brand communication.

Graphics Lead — CodeChef ABESEC Chapter

Aug 2025 – Present

- Led a 5-member design team to produce branding and promotional graphics for 10+ coding contests and workshops attended by 300+ participants; delivered all assets on time using Figma.
